

**Cetyl Myristoleate** is the wonderful supplement for:

- Osteoarthritis
- Rheumatoid Arthritis

Harry W. Diehl, a chemist working at the National Institutes for Health (NIH) in Bethesda, Maryland isolated cetyl myristoleate (CMO) in 1964. His research was based on the knowledge that mice were 100% immune to Arthritis and the compound responsible for it was CMO. Subsequently a research was conducted by Dr. H. Siemandi, MD,PHD, on 382 patients afflicted with arthritis which proved CMO is also effective combined with glucosamine and/or MSM.

Other studies have also shown efficacy and are available upon request.

Cerasomal-cis-9-cetylmyristoleate is the biomedical name. It is a completely natural substance found in certain animals such as cows, beavers, mice, and whales and has recently been produced from the African Kombo nut. As supplied in capsules, it is a naturally derived, highly purified and refined waxy ester prepared for oral administration.

Cetyl Myristoleate is an ester of fatty acid. Cetyl Myristoleate, an oil, is the hexadecyl ester of the unsaturated fatty acid cis-9-tetradecenoic acid. The common name for the acid is myristoleic acid. Myristoleic acid is found commonly in fish oils, whale oils, dairy butter, and kombo butter. The chemical formula for cetyl myristoleate is  $(Z)\text{-ROCO}(\text{CH}_2)_7\text{CH}=\text{CH}(\text{CH}_2)_3\text{CH}_3$ .

Myristoleic Acid when combined with a long chain alcohol molecule cetyl alcohol, a fatty acid ester is produced known as Cetyl Myristoleate. Both the precursors are obtained from nature.

CMO is not a pain reliever like other remedies, nor is it a steroid or anti-inflammatory. It is an immunomodulator. It is a very unique help for Arthritis health. Instead of treating the symptoms of pain and inflammation, CMO acts against the cause of Arthritis, and slows the attacks on the joints, thus the symptoms of pain and inflammation are greatly reduced...\*

For more information, give us a call and we will set up a conference call with our expert and/or a trip to your company. We are available for free presentation and consultation (with the purchase of our product) for your proprietary formulations.

Ask for **CFA20®/CMO20®**, the only cetyl blend with 20% guaranteed cetyl myristoleate.
