## News Release!

- A new study that started in 2009 on the "ALLICIN BIOAVAILABILITY OF GARLIC PRODUCTS" and took two years will soon be released. The preliminary results are very positive, and as soon as the study is publicly published, it will be noted in our next newsletter. Please keep watching for it.
- Come by to discuss the study with us & bring this coupon to our booth # 25068 at Supplside West in Las Vegas for our yearly drawing

## Newsletter- Fourth Quarter 2011

### The Garlic 's "Stock" Market for 2012

The astonishing surge in the price of Chinese garlic market took us all by surprise **last year** as China reduced its total garlic planting areas by 50 per cent, diminishing the overall supply and giving speculators a reason to assume future shortages.

Confirming the latter, the **garlic prices for 2012** did not go down at the rate it was expected, and the current market is unprecedented. We all thought that the costs would flatten and come back down in light of a larger garlic crop this year, but contrary to our beliefs, the crop was gone as soon as it was available. . We are seeing an increase of 30% in the US market price just over the past two weeks. The concern is not just the price, but also the availability of the raw material in particular the high Allicin material. Some large speculators purchased huge quantities of garlic at a slightly lower cost than last year, which drove prices up and tightened availability of the raw garlic material in general. Keeping in mind that **only** <2% of the raw garlic qualify for high Allicin

Summarizing the situation, New-Gar® will be offered at a 10%-20% decrease in prices for 2012. Nature\*4\*Science Inc., along with our manufacturing partner, Harmoni Zhengzhou, have paid a large investment once again to secure enough inventory for 2012 to our valued customers.

## GARLIC Throughout the Years

Even though garlic is a mature category, the interest is steadily rising as new studies keep surfacing with strong positive results. Garlic has been among the top 5 selling herbs in the market for the last 7 years.

Today garlic is one of the most researched plant medicines. Scientific studies had investigated garlic's medicinal properties. Through these studies, garlic has been verified an important natural supplement in the treatment of many health problems.

Among the Claimed Garlic Benefits are:

1. Curbing cholesterol control,
2. Cardiac remedies & benefits,
3. Anti-Oxidant effects,
4. Atherosclerosis/Arteriosclerosis,
5. Cancer prevention,
6. Colds and flu,
7. Therapy in dentistry-Gum infection,
8. Helicobacter pylori,
9. Vaginal yeast cure,
10. Athlete foot and other fungal skin infection
